

Correction and retraction policy

Correction of data

All authors should account for the accuracy of the published data. Correction of data should be done before the final printing of the paper. For that reason, the corresponding author receives the galley proof of the paper and is asked to correct it carefully and in timely manner (within 48 h) before publication. If authors find a major mistake or error in the published version of the article, an Erratum will be published in the first available issue and posted online.

Retraction of published papers

If the authors made an honest error or discover the major flaws in their work, they can retract the paper. The online version will then be marked as 'retracted by authors'. All links to the retracted article will be maintained. If the editors, reviewers or readers notice a case of duplicate or overlapping publication, fraudulent use of data, plagiarism or unethical research, the paper will be, after an internal review by the editor, retracted, in which case the online version will then be marked as 'retracted by editor'. All links to the retracted article will be maintained. All retractions will be done in accordance with the [COPE retraction guidelines](#).
